

Enhanced User Experience – Changes to Accessing AHP Online

FHLBank Pittsburgh has been taking steps in 2021 to enhance our online user experience. This includes a **new secure online banking website and application portal**, which will replace the current Bank4Banks® later this year. While the way you access AHP Online will be different, the application itself will not change. Users will still need to use the Internet Explorer 11 browser to successfully view the AHP Online application.

On **March 22**, AHP Online sponsors and consultants will receive a secure email from FHLBank with information about logging into the new secure website portal. Users are encouraged to test their access as soon as possible to verify they can successfully access the new portal.

Starting **March 29**, users will begin accessing the AHP Online application through the new portal. The current AHP Online link in Bank4Banks will be disabled at that time.

For assistance or questions about AHP Online or the new secure website portal, contact FHLBank at 800-288-3400, option 2.
